The end of another week in Sunnybrow. This has been a particularly hard week but I would like to say a huge thank you from me and all the staff for all of your kind words and understanding. It has been a tough time but your kindness has really helped to keep us all going.

SATs week is now at an end and we are blown away with how well the Year 6 children dealt with them. There were some tricky papers (I certainly couldn't have answered some of the questions), but our children showed determination and huge amounts of ambition and resilience. I can't express how proud I am of them all! Regardless of the results, they are winners in my eyes. Also, I must add that I had the Year 5 children while Year 6 were completing the tests and I was really impressed with how hard the children worked.

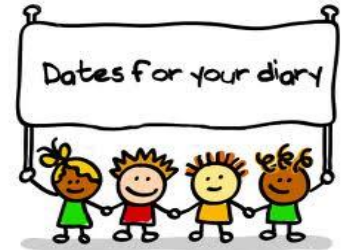

Sports Day was a huge success. The sun came out for us all and it was such a fun day. Thank you to all the parents who took part in the race...maybe next year we will have to do a staff race (watch this space)!

Class One children visited St. Stephen's Church on Tuesday and took part in a Baptism. Thank you once again to

Reverend Shirley for welcoming us. Class Two have been working hard in their Computing lessons. They have used the Skitch app to take photos and annotate their images. The children explored our outside area looking for living things which is linked to their Science topic then they worked together to annotate the image using arrows and text.

Class 3 have been reading How to Train Your Dragon by Cressida Cowell. They designed their own dragons that could be trained to complete different tasks for their Viking owners. Then, they tried to use powerful adjectives and expanded noun phrases to describe them.

Online Safety

Wearable tech is increasingly big business. More than 170 million smartwatches were sold globally in 2022, for example, with Apple biting off the largest chunk of the market (26% - some distance ahead of Samsung, in second with 9%). That's partly because they have more than 21,000 apps available for their devices, allowing users to customise their smartwatch experience.

Both Apple and Samsung's products, of course, lean towards the higher spec end of the market – usually with price tags to match. Sourcing a less expensive alternative, however, often also means inferior safety features to protect young wearers. That's just one of the potential hazards highlighted in the National Online Safety guide to smartwatches. In the guide you'll find tips on a number of potential risks such as location tracking, causing distractions at school and the danger of theft.
